Exercise: Create Menu Entries

User Interface API

PUBLIC

INTRODUCTION

The form of your Add-On solution should be displayed when the user chooses your new menu entry. For that purpose, you will create a new entry and handle the menu event.

In this exercise, you will perform the following tasks:

1. Add entry into the main menu (Modules)
2. Handle menu event
3. Add Context menu entry
4. Remove the menu entries

PREREQUISITE:

- Use the **C Sharp** (C#) language during this exercise
- Use Microsoft Visual Studio 2005 or higher version
- Use the demo database for SAP Business One, version for SAP HANA or SAP Business One
- Credentials: User code: **manager**

GUIDELINES:

The screenshots provided here are for your reference only and may differ from the actual screenshots in your system.

1. TASK - ADD ENTRY INTO THE MAIN MENU (MODULES)

1.1. Add a menu entry to the "Modules" menu called **DVD Store**. Those are the menu entries which are also displayed in the Main Menu. Add a new sub-menu to that menu entry called **DVD Availability**.

Ideally you use the specification for the menu of the “Course Project” example!

2. TASK - HANDLE MENU EVENT

2.1. When you choose the menu entry, your form should be displayed.

3. TASK - ADD CONTEXT MENU ENTRY

3.1. Add another menu only visible when your form is open. This menu should appear under the GoTo menu.

Use the Menu collection property into the Form object to link the menus to your form

4. TASK - REMOVE THE MENU ENTRIES

4.1. Create an event handler for the Context menu entry “Remove Menu” to remove all menu entries.
